The value is in the adoption & productive use, not the tool.

CSG Pro designs and develops highly functional and collaborative cloud or hybrid SharePoint solutions firmly rooted in business strategy. Implementing tools like Office 365 with SharePoint Online is smart, but unless your organization achieves wide-scale adoption, your investment return is limited.

What's the CSG Pro difference? We know that business requirements, design, user interface, information architecture, and governance are not just "nice to have", but are essential elements to any successful implementation.

Perhaps your company or department is still inflicted with manual business processes, you can't access information or people. Maybe there's room to improve collaboration or your team just isn't as productive or motivated as they could be. You recognize there is benefit to transforming those hurdles into a manageable, modern, automated set of processes or solution. Well, CSG Pro can help. Let us show you why SharePoint Online may be that ideal answer. After all, it's not just the tool, but rather a robust, scalable, functional and yes, beautifully designed solution centered on current and future business requirements.

"Prove it" you say? OK, we'd love to. For a limited time, we're doing just that by investing with you in an Envisioning Engagement.

Envisioning Engagement

What you receive	A business-level envisioning engagement to identify key challenges to productivity or other inefficiencies. You will receive documented findings, with recommendations or high-level descriptions of solutions that can be implemented to help overcome such challenges.

How you benefit	• Innovative processes or solutions are identified to address roadblocks. • See how your return on software investment could drive greater business value. • Obtain a view of modern solutions with current and future, horizontal impact to the organization's, cost, image and productivity. • See how credibility and collaboration could grow between IT and business with highly functional, cost effective and beautiful solutions proposed to the organization.

How we deliver	A structured in person, multi-day engagement with defined processes and deliverables, yet flexible to match client's culture and processes. CSG Business Analysts engage with client contacts via a focus group interview format consisting of business users and stakeholders.

Scope of offering	• **90-minute Consultation:** o On-site, stakeholder conversation. • **3-day engagement** o 1 day onsite, 2 days for write-up, 90 minute presentation of deliverable. • **5-day engagement** o 2 days onsite, 3 days for write-up, 90 minute presentation of deliverable.

Investment *engagements must be booked prior to December 20th, 2013.*	• 90-minute business development consultation: **no cost.** • 3-day Envisioning Engagement: o $**2,500.00** *(Valued at $3,720.00).* • 5-day Envisioning Engagement: o **$5,000.00** *(Valued at $6,200.00).*
